WOOD PRODUCTS TECHNICAL PUBLICATIONS ORDER FORM

Wood Design Package
\$150 plus \$15 handling

2005 Wood Design Package

The 2005 Wood Design Package includes the code-recognized National Design Specification® (NDS®) for Wood Construction (2005 Edition) with both the NDS Commentary and NDS Supplement: Design Values for Wood Construction. The Wood Design Package brings together all required elements for design of wood structures in one comprehensive set. It includes design information and examples for wind and seismic conditions, sawn lumber, structural glued laminated timber, structural-use panels, shear walls and diaphragms, poles and piles, I-joists, structural composite lumber, structural connections (nails, bolts, screws), metal plate connected wood trusses, and pre-engineered metal connectors. Over 1,000 pages.

The Wood Design Package includes:

- National Design Specification® (NDS®) for Wood Construction with NDS Commentary; and NDS Supplement – Design Values for Wood Construction
- Special Design Provisions for Wind and Seismic (SDPWS) with Commentary
- ASD/LRFD Manual for Engineered Wood Construction, 2005 Edition
- Structural Wood Design Solved Example Problems

Note that AWC Design Professional Members (DPM) receive special discounts on AWC publications.

2005 WOOD DESIGN PACKAGE

Includes the code-recognized *National Design Specification® (NDS®) for Wood Construction* (2005 Edition) with both the *NDS Commentary* and *NDS Supplement: Design Values for Wood Construction*. The *Wood Design Package* brings together all required elements for design of wood structures in one comprehensive set. It includes design information and examples for wind and seismic conditions, sawn lumber, structural glued laminated timber, structural-use panels, shear walls and diaphragms, poles and piles, I-joists, structural composite lumber, structural connections (nails, bolts, screws), metal plate connected wood trusses, and pre-engineered metal connectors. The Wood Design Package includes: *2005 NDS with NDS Commentary and NDS Supplement; Special Design Provisions for Wind and Seismic (SDPWS) with Commentary; ASD/LRFD Manual for Engineered Wood Construction, 2005 Edition; Structural Wood Design Solved Example Problems*. Over 1,000 pages. Price \$150. Six or more copies \$135 each. Members/Students \$50. [T101-05]

AWC STANDARDS AND DESIGN TOOLS CD ROM (2007 EDITION)

2005 Wood Design Package with 2005 NDS and 2001 WFCM on CD-ROM in fully indexed PDF format. To access a document, a keycode must first be purchased online to activate and open it. CD shipped free upon request. See website for prices. Contact awcpubs@afandpa.org for a CD or download installation files at www.awc.org. [T101-05-E, T10-01-E]

WOOD FRAME CONSTRUCTION MANUAL FOR ONE- AND TWO-FAMILY DWELLINGS (2001 EDITION)

ANSI approved document that provides engineered and prescriptive requirements for wood-frame construction based on dead, live, snow, seismic, and wind loads derived from the 2000 *International Building Code (IBC)*. Designers and code enforcement officials now have one comprehensive design reference to provide solutions for residential wood construction, which is increasingly being regulated, especially in higher load regions. 322 pages. Includes *Commentary*. Price \$60. Six or more copies \$54 each. Members/Students \$30. [T10-01]

PERMANENT WOOD FOUNDATION (PWF) DESIGN SPECIFICATION - ANSI/AF&PA PWF-2007

Design requirements for basement and crawl-space foundations from pressure-treated wood. This construction system is approved by model codes and utilizes conventional framing methods and can be installed in all types of weather. 20 pages. Electronic only. Price \$30. Members \$15. [T07-07-E]

WFCM HIGH WIND GUIDES (2001 EDITION)

AWC has developed a new series of easy-to-use *Guides to Wood Construction in High Wind Areas*. Separate documents address wind design requirements in 90, 100, 110, 120, and 130 mph wind zones. These Guides are based on provisions contained in AF&PA's *Wood Frame Construction Manual (WFCM) for One- and Two-Family Dwellings, 2001 Edition*, the reference document for high wind wood-frame construction in the *International Residential Code (IRC)*. Use of the high wind provisions of these Guides will result in design solutions that prescriptively meet the requirements of the *WFCM* and the *IRC*. 28 pages each. Five volume set. Price \$68. Six or more copies \$62.00 Member/Students \$54.00. [T10-01-HWG] See order form for individual title pricing.

WOOD FRAME CONSTRUCTION MANUAL FOR ONE- AND TWO-FAMILY DWELLINGS (1995 SBC High Wind Edition)

Provides engineered and prescriptive design requirements for wood frame one- and two-family dwellings in high wind areas (90-120 mph). Provisions of the *WFCM-SBC* are based on wind loads derived from provisions of the *1994 Standard Building Code* with 1996 revisions for buildings 60 ft. or less in height. 236 pages. Includes *Commentary*. Price \$20. Six or more copies \$18 each. Members/Students \$14. [T10-95]

WFCM WORKBOOK: DESIGN OF WOOD FRAME BUILDINGS FOR HIGH WIND, SNOW, AND SEISMIC LOADINGS

Provides a design example, typical checklist, and background information related to design of a wood-frame structure in accordance with AF&PA's *Wood Frame Construction Manual (WFCM) for One- and Two-Family Dwellings, 2001 Edition*. The design example uses plans from a 2-story residence as the basis for a structural design to resist wind, seismic, and snow loads. 136 pages. Price \$24. Six or more copies \$22. Members/Students \$18. [T10-01WB]

Free at www.awc.org

WOOD STRUCTURAL DESIGN DATA (1986 EDITION WITH 1992 REVISIONS) (WSDD)

Technical manual on design of typical wood structural members. Data and statistical tables on mechanical and physical properties of lumber, terminology, symbols, design formulas, and the load tables for large beams, columns, floor joists, and other useful data. Includes *Design Values for Wood Construction (NDS Supplement)*. 260 pages. Price \$50. Six or more copies \$45 each. Members/Students \$25.00. [T05]

SPAN TABLES FOR JOISTS AND RAFTERS (2005 EDITION)

Simplified system for determining allowable joist and rafter spans. Includes *Design Values for Joists and Rafters*. 44 pages. Price \$14. Six or more copies \$13 each. Members/Students \$12. [T03/T04] *Free at www.awc.org*

DESIGN VALUES FOR JOISTS AND RAFTERS (2005 EDITION)

Tables of design values for joists and rafters based on the *2005 NDS Supplement*. 18 pages. [T04] *Free at www.awc.org*

WCD NO. 1 - DETAILS FOR CONVENTIONAL WOOD FRAME CONSTRUCTION (2001)

Proper methods of construction in wood-frame buildings, with information on features which contribute to the satisfactory performance of wood structures. 54 pages. Price \$10. Six or more copies \$9 each. Members/Students \$8. Purchase PDF at www.awc.org - \$10 non-member, free to members. [T11]

WCD 2 - TONGUE AND GROOVE ROOF DECKING (2004)

Nominal three and four inch decking is especially well adapted for use with glued laminated arches and girders and is easily and quickly erected. This document contains all that's needed to design and construct tongue and groove wood roof decking, including span and load tables. 12 pages. Purchase PDF at www.awc.org - \$10 non-members; free to members. [T12]

WCD NO. 4 - PLANK AND BEAM FRAMING FOR RESIDENTIAL BUILDINGS (1989)

Shows how this floor and roof framing system, traditionally used in heavy timber structures, can be adapted to home building. 28 pages. Purchase PDF at www.awc.org - \$10 non-member, free to members. [T14]

WCD NO. 5 - HEAVY TIMBER CONSTRUCTION DETAILS (1989)

Framing and fastening details for fire resistant heavy timber construction, with definitions acceptable for direct incorporation into building codes. 28 pages. Purchase PDF at www.awc.org - \$10 non-member, free to members. [T15]

WCD NO. 6 - DESIGN OF WOOD FRAME STRUCTURES FOR PERMANENCE (2006)

Text and detail drawings provide the latest information on protection against moisture, termites, and decay. Emphasizes importance of proper design and construction to achieve permanent wood structures. 16 pages. Purchase PDF at www.awc.org - \$10 non-member, free to members. [T16]

TECHNICAL REPORT SERIES

T.R. NO. 5 - THE WOOD-FRAME HOUSE AS A STRUCTURAL UNIT

Evaluates structural performance of a full-scale house subjected to simulated wind and gravity load combinations. 28 pages.

Free at www.awc.org.

T.R. NO. 8 - ENERGY CONSERVATION STUDY: A PERFORMANCE COMPARISON OF A WOOD-FRAME AND A MASONRY STRUCTURE

A study of the comparative costs and comfort in heating and cooling a wood-frame and a masonry test structure in the Phoenix, Arizona area. 16 pages.

Free at www.awc.org.

T.R. NO. 9 - HEAT RELEASE RATES OF CONSTRUCTION ASSEMBLIES BY THE SUBSTITUTION METHOD

Study describing efforts to develop measurement methods for determining the rate of heat release of full-scale assemblies. 24 pages.

Free at www.awc.org.

APPENDIX TO T.R. NO. 9 - FIRE PERFORMANCE CHARACTERISTICS OF PROTECTED WOOD AND STEEL FLOOR-CEILING ASSEMBLIES

Analysis of fire tests conducted at Ohio State University to demonstrate the heat release of full-scale wood and steel joist floor assemblies by comparison of fuel consumption data. 20 pages.

Free at www.awc.org.

T.R. NO. 10 - CALCULATING THE FIRE RESISTANCE OF EXPOSED WOOD MEMBERS

As wood members are exposed to fire, an insulating char layer is formed that protects the core of the section. Thus, beams and columns can be designed so that a sufficient cross section of wood remains to sustain the design loads for the required duration of fire exposure. 45 pages.

Free at www.awc.org.

T.R. NO. 12 - GENERAL DOWEL EQUATIONS FOR CALCULATING LATERAL CONNECTION VALUES

Covers calculation of lateral values for single dowel type fastener connections using a generalized and expanded form of the 1997 *NDS* yield limit equations. Contains general information, example problems and equation derivations. 24 pages.

Free at www.awc.org.

T.R. NO. 14 - DESIGNING FOR LATERAL-TORSIONAL STABILITY IN WOOD MEMBERS

Describes the basis of the current effective length approach used in the *NDS* and summarizes the equivalent uniform moment factor approach; provides a comparison between the two approaches; and proposes modification to *NDS* design provisions. 43 pages.

Free at www.awc.org.

DESIGN FOR CODE ACCEPTANCE SERIES

DCA NO. 1 - FLAME SPREAD PERFORMANCE OF WOOD PRODUCTS (2001)

Provides building code accepted flame spread ratings for various wood products and species which are normally used as interior finishes for walls, ceilings, and floors in buildings. 5 pages.

Free at www.awc.org.

DCA NO. 2 - DESIGN OF FIRE-RESISTIVE EXPOSED WOOD MEMBERS (2000)

Illustrates how exposed heavy timber and glued laminated columns and beams can be designed to meet building code fire resistance requirements. 10 pages.

Free at www.awc.org.

DCA NO. 3 - FIRE RATED WOOD WALL ASSEMBLIES (2004)

Explains how interior and exterior wood-frame walls can be used to meet building code requirements for fire-resistive assemblies. 9 pages.

Free at www.awc.org.

DCA NO. 4 - COMPONENT ADDITIVE METHOD (CAM) FOR CALCULATING AND DEMONSTRATING ASSEMBLY FIRE ENDURANCE (1991)

Describes a procedure to calculate the fire endurance rating of a wood-frame wall, roof, or floor/ceiling assembly. The procedure is based on combining previously determined fire resistance time values for each separate component of the assembly without the need for additional fire testing. 6 pages.

Free at www.awc.org.

DCA NO. 5 - POST FRAME BUILDINGS

Provides guidance to post-frame building designers for meeting the requirements of the 2000 *International Building Code* and to confirm that a properly designed post-frame building is in fact code compliant. 4 pages.

Free at www.awc.org.

ADDITIONAL PUBLICATIONS

WOOD AND TIMBER CONDITION ASSESSMENT MANUAL

This manual stems from numerous research studies, inspections, and lectures dealing with assessing the condition of in-service wood and timber. This manual is intended for inspection professionals. 75 pages. Price \$39. Six or more copies \$32. Members/Students \$25. [7239]

ORDERING INFORMATION

The publications described in this brochure have been prepared by the American Forest & Paper Association and reflect the best building practice and wood product use information available. Items are priced in accordance with varying costs of production and distribution and are subject to change.

Due to constantly changing inventories, it must be assumed there will be occasions when the stock of a particular publication will be temporarily exhausted. For this reason, please indicate whether any publication should be back ordered (to be mailed when the publication(s) is reprinted).

All orders will be shipped UPS Ground (prepaid) unless otherwise requested. Please allow eight working days for delivery from receipt of order.

Next Day or 2nd Day UPS shipping is available upon request. Call for rates.

To place an order fill out the order form, compute your cost, and mail with your check, VISA, MasterCard, Discover, or American Express credit card information or money order to:

American Wood Council
 Publication Order Department
 P.O. Box 5364
 Madison WI 53705-5364
 or Phone: 800-890-7732 or 608-232-9354 or use
 Fax: 608-231-2152.

RETURN POLICY

The AWC Publication Order Department will accept returns within a maximum of one (1) month from the date of the invoice.

No refund will be issued until the book(s) have been received by the AWC Publication Order Department and determined to be in a resalable condition.

Refunds will be issued, minus a 10 percent restocking charge, for those books judged to be resalable. Damaged books or those with stamped-on or affixed prices will not be accepted and will be returned to you with no refund.

THE AMERICAN WOOD COUNCIL

The American Wood Council (AWC) is part of the wood products group of the American Forest & Paper Association. AWC is recognized nationwide for its contributions to the development of sound building code practices, engineering research related to wood construction and performance, and for its standards development.

AWC engineers conduct and coordinate technical research on all aspects of wood construction. They also develop state-of-the-art engineering data, technology, and standards for use by engineers, architects, builders, and building code regulators.

For example, AWC developed the *National Design Specification (NDS) for Wood Construction*, which has been the fundamental reference standard for wood design in the nation since its introduction in 1944.

AWC also enhances its website regularly to provide publications, education, and software online. Visit www.awc.org for more information.

Regular updating of AWC's technical publications assures state-of-the-art engineering data, efficient design, and safe use of wood structural members and assemblies. Whether you are an engineer, architect, builder, or building code official, you can depend on the American Wood Council for the best available information on wood construction and performance.

This listing gives brief descriptions of the information contained in AWC's technical publications. To place an order contact AWC's Publication Order Department by phone 800-890-7732 or 608-232-9354, or by fax 608-231-2152, or write American Wood Council, Publication Order Department, P.O. Box 5364, Madison, WI 53705-5364.

WoodWorks® Design Office

contains a set of Windows-based wood design tools including:

- Sizer
- Connections
- Shearwalls
- Code Conforming Wood Design
- 2005 NDS in PDF format

WoodWorks®

Developed by practicing engineers, these programs allow quick and accurate design of structural members, connections, and shearwalls.

Visit the website at

www.woodworks-software.com

or call

800-844-1275

to order. AWC members receive a discount.

Become a DESIGN PROFESSIONAL MEMBER

Design Professionals need to stay abreast of progressive wood industry issues and changing building design standards. To help professionals stay informed about the technical issues affecting the wood industry, the American Forest & Paper Association (AF&PA) is offering a Design Professional Membership in its American Wood Council (AWC). The AWC, a product group of AF&PA, provides basic wood design and construction information to assist engineers and architects, develops structural and fire performance data on a wide range of traditional and engineered products, and engages in long-term research.

Design Professional Members receive:

- Optional listing in the *AF&PA Design Professional Services Website Directory* with a description of professional services offered. (Check box on application to receive a form.)
- Member discounts on technical publications.
- AWC *IMPACT* newsletter.
- Wood Design Focus*, a quarterly journal of contemporary wood engineering.
- Wood Design & Building*, a quarterly North American magazine on design and construction of modern wood buildings.
- Frequent updates on wood industry developments, association activities, new publications, and special reports on engineering, building codes, standards, fire technology, and research projects.
- Announcements of seminars offering CEU credits.
- Access to technical information through a direct 800 phone number to AWC.

DESIGN PROFESSIONAL MEMBERSHIP APPLICATION

Please send me a form to complete and return so I will be listed in the *AF&PA Design Professional Services Website Directory*.

Payment enclosed Please bill my: VISA MasterCard Discover

Card #: _____ Exp. Date: _____ CVV: _____

Please send completed application and check (made payable to the American Forest & Paper Association) for \$100.00 for North American applicants, \$50.00 for students (verification required), or \$150.00 for international applicants to Member Relations, AF&PA, 1111 19th Street, NW, Suite 800, Washington, D.C. 20036. Credit card orders can be faxed to 202-463-4703.

Dues, contributions, or gifts to AF&PA are not deductible as a charitable contribution for income tax purposes. Payments, however, may be tax deductible as ordinary and necessary business expenses subject to restrictions imposed by recent federal tax law changes. No portion of your design professional member dues are allocable to lobbying.

Membership dues are based on the calendar year (January 1 - December 31). Dues are pro-rated depending on when your application is received. January 1 - March 31: full dues; April 1 - June 30: 25% pro-ration; July 1 - September 30: 50% pro-ration. New or reinstated applications with payment received on or after October 1 will be given membership for the remainder of the current year and the next calendar year.
