***the National Design Specification® (NDS®) for Wood Construction***

<b><u>Page</u></b>	<b><u>Revision</u></b>
40	Revise $K_{rs}$ as described in Equation (5.4-3) as follows (replace $d_e$ with $d_c$ ):

$$\begin{aligned} K_{rs} &= \text{empirical radial stress factor} \\ &= 0.29(\frac{d_c}{R_m}) + 0.32 \tan^{1.2} \phi_T \end{aligned}$$
