### **Codes and Standards Addenda and Amendments Related to Design Value Changes**

The American Lumber Standard Committee (ALSC) Board of Review has approved changes to design values for all grades and all sizes of visually-graded Southern Pine and Mixed Southern Pine lumber, 2"- 4" thick, with a recommended effective date of June 1, 2013. For more information, visit [www.spib.org](http://www.spib.org) and [www.southernpine.com](http://www.southernpine.com).

AWC has developed [addenda and other updates](#) to use with new construction designed in accordance with many of its standards and design tools. However, this document has not been updated to include changes to design values. Designers are urged to download the addendum to the [2012 NDS Supplement](#), which contains the new design values, and use them accordingly with this document.

For additional information or questions, visit the AWC website at [www.awc.org](http://www.awc.org) or email your request to [info@awc.org](mailto:info@awc.org).

Thank you.
